4X4 AUPART

CATALOGUE 2024

Aupart 4x4, the best manufacturer of 4x4 components

Aupart is originally established in 1977 as a forging product factory. We supplied forging products to most of automotive part factories in Taiwan. Therefore we accumulate a strong reputation and technique during these 30 years.

In 2005, Aupart started manufacturing auto part products and exporting to whole of the world. We not only supply a wide range of products, but also constantly keep developing new products. In 2008, a new project was initiated focusing on 4x4 products. Considering a high quality and awesome performance needed for 4x4 products, AUPART 4x4 was launched and began a huge development on 4x4 parts which have earned a great reputation as our high quality products. In 2018, in order to improve and enhance the production management, we added CNC turning and milling machines.

Being the best 4x4 product manufacturer in Taiwan, our goal is to supply you a top quality product. Remember! The products you purchase from AUPART 4x4 are the best with world class products which are developed to suit your country conditions. Ready to lift your car? Don't forget AUPART 4x4 is always your best mate for off-road!

FRONT UPPER CONTROL ARM

Aupart Upper Control Arms have been designed with ease of fitment & ongoing serviceability in mind, and are a necessity for various IFS models that have been lifted 30mm+. The Aupart arms have been designed to restore camber & caster lost on the IFS vehicles once they have been lifted, by correcting the angle of the ball joint. Without restored camber & caster settings lifted IFS vehicles will eventually show excessive tire wear and experience ride & steering issues.

We haven't gone with a complicated ball joint or bushing setup - we have designed the ball Joint & bushing apertures to take OE spec componentry! That way if you have a ball joint or bushing issue in an out of the way area, where getting spares can be a drama, you can replace your affected part with a standard OE Spec factory or aftermarket unit.

Features & Benefits - Upper Control Arms

- Angled Ball joint Aperture - allows for better articulation of the ball stud.
- Repositioned Ball Joint Aperture - 3 degrees increased caster.
- Repositioned Ball Joint Aperture – maintains camber.
- OE Spec Ball Joint Aperture - takes standard factory or aftermarket ball joint.
- Revised Radius Bends (Internal) - increased suspension articulation.
- Revised Radius Bends (External) - allows fitment of larger tyres.
- OE Spec Bushing Aperture - takes standard factory or aftermarket bushings.
- Heavy Duty 32mm OD Tube (6mm wall) - increased strength over factory arm unit
- Black E-Coating - maximum durability, rust prevention and discreet installation.

ADJUSTABLE PANHARD ROD

An absolute necessity on all raised 4WD's is the Adjustable Panhard Rod. Designed to correct axle alignment, the fitment of an Adjustable Panhard Rod eliminates potential contact between tyre and body, and improves handling issues on vehicles on vehicles lifted 2"+. All Aupart Adjustable Panhard Rods are Heavy Duty, single thread off car adjustable and come complete with bushings and steering damper mounting brackets where applicable.

The majority of Aupart Adjustable Panhard Rods now come standard with high flex Rubber Bushings. This has been a gradual change based on customer demand. Our Aupart rubber bushings bring the factory ride feel to the upgraded replacement Adjustable Panhard Rods. The high flex Aupart rubber bushings offer less Noise, Vibration & Harshness over the polyurethane bushings for panhard applications.

Aupart Rubber and Urethane bushings are the same dimensions as factory original, so all rods are manufactured to factory bush specifications. Bushing replacement if required is easy - just use factory original or aftermarket.

Design changes over time have seen the implementation of double nuts for extra security, 150mm of adjustment to suit for 2-6” lifts and fine 2.0mm pitch thread for finer adjustability.

AUPART 4X4

PANHARD ROD RUBBER BUSHING

To supplement our range of standard Front end lines, Aupart have been developed a range of rubber bushings suitable for 4WD applications. Manufactured from Nature Rubber, Aupart rubber bushings offer longer wear characteristics, in addition to the ability to absorb minor vibrations and noise from neighboring suspension parts. Nature Rubber bushings are generally noise free in their own operation (where in good condition!)

DRAG LINK/ TRACK ROD/ RELAY ROD

Aupart offer a full range of Heavy Duty Drag Links and Track Rods to suit for a heap of 4WD's. It's not a case of 'one style for all' at Aupart. The range includes a 'Startup' upgraded version, a 'Serious' 4WD version, and the ultimate 'MF Comp' style in 4140 Chromoly Steel. Compatible with common Land Cruisers and Patrols. Even the 'Startup' version for Patrols is a huge upgrade over standard, featuring 30mm OD with 6.5mm wall thickness, in addition to Heavy Duty replaceable tie rod ends.

When purchasing genuine Land Cruiser Track & Relay Rods, you must buy the rod separate to the ends. Aupart offer a complete 'upgraded' solution in the one purchase!

Aupart offer a full range of Tie Rod Ends to suit for standard passenger and 4WD vehicles. Please consult the Aupart website with regard to your particular enquiry - www.4wdparts.com.tw

REAR TRAILING ARM – UPPER & LOWER

If your Rear Lower Trailing Arms have taken a knock, and look a little bit bent, then it's time for a new one!

Your Rear Lower Trailing Arms on Patrols & Cruisers should not look bent!

Aupart Rear Upper & Lower Trailing Arms are built tough, so when you bump them up against rocks & tough terrain, they won't bend as much as the standard arms. You've got to really give the Aupart ones a decent smack to get the 5mm wall thickness to buckle in. We're not claiming Aupart arms are infallible, there will always be a bloke who wants to hang his truck up by the lower Rear arms with bending consequences, but for your average 4WD'er one set of Aupart arms should see you through the life of your truck.

Manufactured to factory bush specifications & supplied complete with high flex rubber bushings.

REAR TRAILING ARM – UPPER & LOWER

AT1259 - NISSAN PATROL GQ-GU

The Aupart Bent Upper Arm for the Patrol just got better!

Got a long range fuel tank on your Patrol, and on articulation you hear a bang on the drivers side? Odds are this is your RH Rear
Upper Trailing Arm fouling on your fuel tank. At full droop the Aupart "bent" design provides for clearance of the fuel tank.
Recent upgrades to the arm now include adjustability, allowing for the correction of the pinion angle affected with lift.

AT0695V2 - NISSAN PATROL GQ-GU

Upper Adjustable Trailing Arms are used to change the pinion angle!

Aupart Nissan Patrol Adjustable Upper Trailing Arms are on-car adjustable for that precise fitment. Coupled up with a super fine 1.5mm pitch thread, and over 200mm of adjustability, Aupart arms will suit just about every requirement.

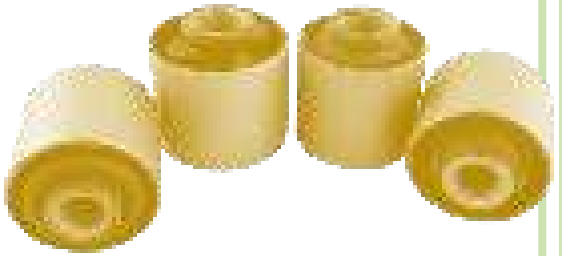
AT0318 – LANDROVER DEFENDER/ RANGE ROVER

New to the range is a Double Cranked Rear lower arm to suit for the Land Rovers!

Yes, we have taken the plunge & done something other than Patrol & Cruiser! The new Double Cranked Arms are supplied complete with Heavy Duty Pin & High Flex rubber bushing. When Land Rovers are lifted, the Rear radius arm to chassis bushings become strained, this means lack of movement in the bushings, which limits suspension droop. Aupart Double Cranked Rear arms are designed to relieve the strain on the bushings, and to improve suspension flex.

Part Number	Application	Lift Height	Location	OD(mm)	Wall Thickness
FORD					
AT1270	FORD EVEREST 2015-on (Standard Length)	2”	Rear Lower	48.80	5.5

REAR TRAILING ARM RUBBER BUSHING



To supplement our range of standard Front end lines, Aupart have developed a range of rubber bushings suitable for 4WD Applications. Manufactured from Natural Rubber, the Aupart rubber bushings offer longer wear characteristics, in addition to the ability to absorb minor vibrations and noise from neighboring suspension parts.

Natural Rubber bushings are generally noise free in their own operation (when in good condition!)
Designed to OE dimension specifications, Aupart replacement Trailing Arm Bushings can be purchased to suit for a wide range of trailing arms.

TORQUE ARM

When raising a leaf Front & Rear spring Hilux, the Aupart Torque Arm should be installed!

Basically the Aupart Torque Arm acts as a diff locater, and adjusts the location of the diff to prevent preloading of the Front suspension. Using the standard torque arm on a raised Hilux will constrict the Front suspension. The Aupart Torque Arm comes complete with High Flex Rubber Bushings for maximum articulation, and adjustability to suit heights up to 3”.

Part Number	Application	Suit Lift
AT0859	TOYOTA HILUX 83-97 4WD	Up to 3"

Part Number	Application	to Suit
KB0120	TOYOTA HILUX 83-97 4WD	AT0859

RADIUS ARM

The Aupart Complete Radius Arm Replacements for the GQ-GU Patrol have been designed for off-road competition use only, offering better handling on lifted vehicles and extra flex. The Aupart AX0431 & AX0432 Drop Arm kit is supplied complete with 4" Dropped Radius Arms, High Flex Rubber Bushings (factory spec dimensions) and low profile Drop Boxes. The Aupart Radius Arms are precision flame cut from massive 32mm thick solid S45C Mild Steel, and include tapped holes for ABS line & sway bar mounts (as standard). Manufactured with high tensile bush eyes, the Aupart arms feature a bushing chassis mount to offer further increased articulation and reduce the bump steer effect caused with factory style arms, resulting in improved handling at higher speeds, all finished in black E-Coating for maximum durability and rust prevention. AX0431 & AX0432 pushes the Front diff forward approx. 15mm.

Part Number	Application
AX0431	NISSAN PATROL GQ 87-96 4WD Y60, NISSAN PATROL GU 97-10 Y61 LH
AX0432	NISSAN PATROL GQ 87-96 4WD Y60, NISSAN PATROL GU 97-10 Y61 RH

RADIUS ARM BUSHING

Aupart have a range of Radius Arm bushings to suit for Patrol & Land Cruiser - including the OFFSET options for 2 degree Caster Correction.

RADIUS ARM SPACER WASHER

Compatible with GQ and GU Patrols with coil Front, the Aupart Radius Arm Spacer Kit is primarily used to 'push' the Front diff forward (approx. 15mm) to give better clearance for larger tyres so they don't hit the Front mud flaps and guards. Another common issue with the Patrols is for the standard radius arm washers to bend following excessive impacts, which can result in premature failure of the arm. Bigger tyres also generally means bigger shocks with longer travel. This increase in travel can put additional stress on the Rear radius arm rubber bushings, causing them to distort or become dislodged. The High Tensile Aupart Radius Arm Spacers, being stronger than standard washers, resist bending and aid in radius arm longevity. The Aupart Radius Arm Spacers are also designed in such a way as to 'cup' the rubber bushing, preventing it from being dislodged, resulting in improved bushing longevity.

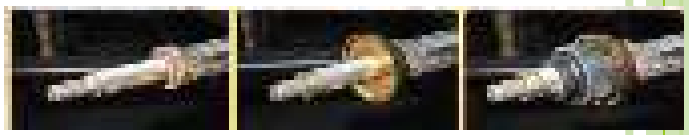
Three options of the Aupart Radius Arm Spacer/ Washer are now available. These now include:

AX0338
AX0338 is basically an upgraded washer, with improved bushing cup. It does not provide for any spacing component. Just replace the original washer with AX0338 which is a stronger replacement with longer side walls.

AX0186
AX0186 is our 'original' radius arm spacer. The washer is stronger, allows for 15mm 'push' of the diff, and has low profile side walls that still offer bush cupping for improved bushing longevity.

AX0337
AX0337 is our improved version of the original. Still offering 15mm 'push' of the diff, and an overall stronger washer, the side walls are increased substantially to
provide for better cupping of the bushing and further improved bushing longevity.

It is recommended that you check the clearance from your diff to your panhard rod before and after fitting the Radius Arm Spacers. The Panhard Rod and Diff Pumpkin run very close on some GU Patrol depending upon other suspension work that has been done on the vehicle. Pushing the diff forward with the spacers can result in the panhard rod making contact with the diff or the Front of the radius arm, affecting the articulation of the panhard rod, which can place additional stress on the panhard welds and brackets, leading to premature failure.



Part Number	Application	Side Wall	Suits Lift

AS0242U & AS0243U - cut to desired length to suit for 2 to 8" Lift.

Jeep
Some Jeep owners want more flex. The Aupart STBJK01A Sway Bar Disconnect has been designed with adjustability to suit a huge variety of lifts for the JK Wrangler from standard to 8" to cater to the 'more flex' market. It is supplied complete with brackets that you install to simply hook the sway bar onto, to keep the sway bar from dragging on the ground following disconnect.

Patrol
In addition to standard replacement sway bar links to suit for the Nissan Patrol, Aupart have designed and manufactured a version to suit lifts from 2-8". Aupart Heavy Duty 'Extended Thread' Patrol Sway Bar Links allow you to effectively trim the sway bar link to your desired length to provide adequate tail shaft clearance and sway bar alignment. Manufactured from Heavy Duty 16mm rod, Aupart Heavy Duty sway bar links offer both increased strength and increased stud articulation, providing for less stress on the sway bar links during wheel articulation.

AS0704	TOYOTA FJ CRUISER 06-10	Rear	

AS0156E use with 48826-60010 standard Rear sway bar bracket.

AX0261 will not suit 100 series with Rear bracket 48826-60010.

Land Cruiser
With suspension lifts installed, the Front & Rear sway bars are moved away from the chassis, reducing articulation. The Aupart extended sway bar brackets are suited for 2-4" lifts, and allow you to effectively lower the outside sway bar link mount points, to re-introduce the appropriate amount of articulation of the sway bars. Plus...you can space down the sway bar to stop it hitting the tail shaft! During the production cycle of the 80 series Land cruisers two different styles of bracket were used for the Rear - a straight style (mounts to side of chassis), and a 'u' shaped style (mounts to underside of chassis) - please ensure you check the vehicle prior to ordering.

AUPART 4X4

www.4wdparts.com.tw

REAR WHEEL MOUNT ASSEMBLY

Compatible with Nissan Patrol the Aupart Spare Wheel Mount Assembly, is supplied to suit GQ & GU Patrols.

Basically the Bracket acts as a spacer sitting between the door and the existing spare wheel mount carrier. As well as spacing the bracket out from the door, it also allows it to be lifted up to provide clearance between the spare & the Rear step. Allowing for a larger spare wheel/ tyre combination to be carried.

Available as an optional extra, designed to suit the bracket, is the Aupart Telescopic Light Pole. A simple design, with minimal moving parts, allowing for the fitment of one or two lights and/or GPS Aerial.

Part Number	Application
AX0347	NISSAN PATROL GQ-GU Rear Wheel Mount Assembly
AX0342	NISSAN PATROL GQ-GU Telescopic Light Pole

WINCH FAIRLEAD

Aupart offer a range of various high quality and versatile Fairleads. The Aupart AX0436 Alloy Fairlead has been designed for those situations where you run a plasma rope on a cable style winch & bar with an existing roller style fairlead. Basically the premise is to replace the roller fairlead with the AX0436 60mm extended fairlead so the plasma rope clears all the sharp objects etc. & minimizes any rubbing on the bar when winching at angles. The setup with the Rear 60mm spacer (with fitting points to suit both standard & 25mm offset) has added benefit of being able to be used as a wide mouth fairlead if required. Fairleads to suit standard winch bars designed to work with plasma rope are also available in both standard, offset and multi-fit designs.

Part Number	Application
AX0436B	ALLOY FAIRLEAD w/60mm Spacer Plate - Black
AX0436S	ALLOY FAIRLEAD w/60mm Spacer Plate - Silver
AX0617	ALLOY MULTI-FIT HAWSE FAIRLEAD w/20mm Offset Hole - Black

DROP BOX

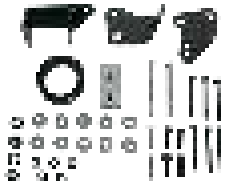
Direct Bolt-In option – no cutting required

Aupart Drop Boxes compatible with Patrol GQ-GU are designed to allow for the radius arms to be dropped slightly below the chassis to correct the caster geometry, correct articulation of the suspension components and improve ride. Aupart Drop Boxes are designed to suit for 3-4” lifts. Aupart offer direct Bolt-In option for the Drop Boxes. No welding or cutting required.

Part Number	Application	Style	Suits Lift
AX0353	NISSAN PATROL GQ-GU Y60 / Y61 DROP BOX LH	Bolt-in	4"
AX0354	NISSAN PATROL GQ-GU Y60 / Y61 DROP BOX RH	Bolt-in	4"

Once fitted your Aupart Drop Boxes will:

- Level the radius arms allowing the wheels to better follow the track surface increasing occupant comfort & traction, in addition to solving caster issues associated with suspension lift.
- Eliminate the preload on the rubber bushings permitting for greater flex & longer bushing life.
- Move the Front diff forward approx. 10mm allowing clearance between tyre & guard (no need for Radius Arm Spacers when Drop Boxes are installed).
- Space the gear box cross member down approx. 8mm improving pinion angles.
- Give a smoother ride due to reduced resistance of suspension components in their natural arc



DIFF DROP KIT

When lifting IFS Vehicles, the Constant Velocity (CV) joints are put on an increased angle. This increased angle of the CV joint during operation can accelerate the wear on the joint, as well as putting additional stress on the CV boots leading to splitting and eventually premature failure of the CV. This wear is accelerated further if larger (wider) wheels and tyres are fitted.

The Aupart IFS Diff Drop Kits are application specific and supplied complete to get the job done. The bolt on kit corrects the geometry on the Front driveshaft and CV’s, lowering the Front diff by approx. 25mm, thus reducing the angles the CV joints need to operate on, and avoiding the expensive replacements of CV’s and boots. Allows the bash plate to be refitted.

TAIL SHAFT SPACER

Is your Manual ML Triton suffering from significant driveline vibration following a suspension lift? This is most likely due to the fact that the Manual ML Triton has a two piece drive shaft with centre bearing. Your mate in the Auto ML Triton, with the same lift, will not have the same issues because the Auto versions have a single piece drive shaft.

Aupart 13.25mm Diff Spacer is fitted between the Rear drive shaft and the diff, lowering the bearing by 5-8mm, and compensates for the absence of a slip joint in the drive shaft prolonging the life of the Centre Bearing. In extreme cases it will not fix vibration issues.

The Aupart Transmission Spacer Kits provide a fix to aid in controlling the driveline vibration and noise after a lift is installed.

AX0420 - Ford Ranger & Mazda BT50
The Ranger/BT50 centre bearing spacers are applied to the u shaped cage that holds the centre bearing into position, and effectively lowers the cage, and centre bearing, down to take the angle out of the pinion. The kit is supplied complete with 12 x 3.9mm spacer washers, to suit for the spacing requirement identified (from 3.9mm to 23.7mm), depending upon your lift. All lift kits quoted for Ford Ranger/Mazda BT50 should include a Centre Bearing Spacer Kit, because driveline vibration can be experienced even with the smallest lifts.

AX0323 - Nissan Patrol
The Patrol transmission spacer plates fit neatly between the transmission plate and the chassis, and works by spacing down the driveline thus reducing driveline angle affected with the lift. The Aupart kit includes 4 precision cut 6mm spacer plates, and fitting hardware to suit (extended bolts). The four spacers allow you to run either 6mm or 12mm spacers depending upon your lift.

COIL STRUT SPACER

INSTALLATION OF AUPART COIL STRUT SPACERS IS THE IDEAL WAY OF GENERATING LIFT ON VEHICLES WITH STRUT FRONT ENDS. COIL STRUT SPACERS BOLT TO THE TOP OF THE STRUT, AND MAINTAIN FULL ARTICULATION OF THE FRONT END. YOU CAN LIFT THE FRONT END TO EVEN OUT THE NOSE DIVE APPEARANCE WHILST STILL EMPLOYING STOCK SUSPENSION.

Aupart Coil Strut Spacers kits includes a pair of coil strut spacers plus fitting hardware (studs, nuts etc.) The Strut Spacers are designed for vehicles running standard coil springs in the Front. If your vehicle is fitted with a winch, bull bar etc., which is weighing the Front end down, then a strut/spring upgrade is required.

EXTENDED SHACKLE

IF YOU ARE AFTER MORE FLEX IN YOUR VEHICLES REAR END, THEN EXTENDED SHACKLES ARE AN EASY WAY TO ACHIEVE IT. BASICALLY THE EXTENDED SHACKLE CREATES A GREATER SWEEPING ARC OF THE SHACKLE WHICH IN TURN PROVIDES FOR MORE WHEEL TRAVEL AND A NICER RIDE. AUPART EXTENDED SHACKLES ARE ENGINEERED TO THE HIGHEST STANDARD, WITH FACTORY SIZE GREASABLE PINS (TO ALLOW INSTALLATION OF FACTORY BUSHINGS) AND 50MM EXTENDED PLATES. ALL AUPART EXTENDED SHACKLES INCORPORATE A STEPPED BOLT DESIGN, ENSURING THAT THE SHACKLES CANNOT BE OVER TIGHTENED, RESULTING IN DEFORMATION OF THE BUSHINGS. AUPART EXTENDED SHACKLES INCORPORATE A GREAT DESIGN FEATURE TO PROTECT THE GREASE NIPPLE AGAINST DAMAGE FROM ROCKS AND DEBRIS THAT COULD BE ENCOUNTERED IN THE INSTALLED POSITION. GIVING 50MM MORE LENGTH THAN THE FACTORY SHACKLE YOU WILL ALSO SEE A LIFT OF BETWEEN APPROX. 25-30MM (DEPENDING UPON APPLICATION). SOLD IN PAIRS.

Give your vehicle an easy lift & fix that "nose dive" appearance by matching a pair of Front coil strut spacers with Rear extended shackles. the 25mm Front coil spacers will give you approx. 37mm of lift and the 50mm Rear extended shackles will give approx. 25-30mm, so you can slightly raise the vehicle, increase Rear articulation and decrease the nose dive appearance. Extended or adjustable shackle plates must not be used to raise vehicles on leaf spring suspensions.

STRUT MOUNT

As part of our Aupart Rubber Bushing program (including the Panhard Rod, Trailing Arm & Radius Arm bushings listed previously), is a good range of 4WD specific Aupart Rubber Strut Mounts to suit a wide variety of applications. Manufactured from Natural Rubber, the Aupart rubber bushings offer longer wear characteristics, in addition to the ability to absorb minor vibrations and noise from neighboring suspension parts. Natural Rubber bushings are generally noise free in their own operation (when in good condition!). All Aupart rubber bushings are manufactured to OE dimensions specifications, so should just press or bolt in to factory or aftermarket components.

HUB SOCKET

Aupart have available both the 'pin style' and '54mm' Hub Sockets to suit for Nissan Patrol. Hub Nuts in the early GQ's are a standard 'normal' hexagonal nut.

Hub Nuts in the late GQ's (Series 2-on) & GU are circular with holes that require pins to slot in and turn. The Aupart AX0253 Hub Socket has prongs that slot into the corresponding holes. Aupart Hub Sockets are designed for use with a ½" drive, so you can use your standard socket set to tighten or remove the wheel bearings.

LEAF SPRING WEDGE

A range of Aupart Leaf Spring 'Caster' Wedges have been developed to suit for universal applications. Used on vehicles with Front and Rear leaf spring, Leaf Spring Wedges aid in correcting the caster angle and work to eliminate driveshaft vibration issues. Aupart Leaf Spring Wedges are manufactured at 63mm wide, with centre hole to allow for proper positioning in the spring pack & diff. It is recommended to fit a 3deg wedge to the Front when using extended shackles, with wedges also fitted to the Rear where required. When fitting in the Front the 'thickest' part of the wedge always goes toward the Front of the vehicle. Aupart Leaf Spring Wedges are available in 4 sizes offering caster correction of 1, 2, 3 or 4 degrees.

BRACKETS RANGE

TOP SHOCK REINFORCING SUPPORTS

Mazda BT50 & Ford Ranger have been known to experience cracking in the Front top shock mounts, when upgraded heavy duty shocks have been installed. When these mounts crack, the top of the shock becomes free. The Aupart Shock Reinforcing Brackets are designed to reinforce this area of the top mount.

COIL TOWER BRACE & VARIOUS STRENGTHENING BRACKETS

Quite common for the Nissan Patrol GQ/GU Rear coil towers to fail resulting in a damaged chassis which can also damage both fuel and brake lines leading to expensive & time consuming repairs.
Aupart4x4 have designed a comprehensive reinforcing system to assist in carrying and spreading the load through the chassis rails. Using CAE the primary brace is laser cut and CNC folded from 1 piece of 4mm carbon mild steel.
This system incorporates an on car adjusting tie bar for each side that ties into the forward cross member triangulating the coil tower brace into the chassis providing increased rigidity in the system and an additional load path to share the load.
Install is very straight forward with basic hand tools, no cutting or welding required. Works with large heavy duty coils found in GVM upgrades, coil insulators and factory or aftermarket Aupart4x4 AX0680 bump stop kits will fit with this system installed.

EXTRA PROTECTION

PATROL FRONT DIFF GUARD

Manufactured from a combination of 6 & 8mm thick plate, the Aupart 4x4 Patrol Front Diff Guards provide that extra protection you need for your Front diff when off-roading. Taking just 10 minutes to fit, the Diff Guard simply bolts on to the diff housing using hardware supplied. We got sick of the other Diff Guards rolling backwards after a knock, so this one is designed to bolt through the radius arm mount, and clamp the diff housing, so there are strong mounting points keeping the guard in place. Additionally, the shape has been refined to run as close as possible to the original diff housing, to allow clearance for aftermarket panhard.

FUEL PUMP GUARD

Have you looked under your Colorado to notice that your fuel pump is mounted in a very precarious position to the frame rail, exposing fuel filters and drain plug in the bottom of the pump to potential damage by rocks and debris when off-roading. If the plug or screw in fuel filters are damaged you will lose all pressure to the fuel rail, which will result in engine failure. Simple solution is to fit a Aupart Fuel Pump Guard to protect the plug and filters.

SUSPENSION LIFT BLOCK

SUSPENSION LIFT BLOCKS

Aupart 50mm Rear Suspension Lift Block Kits are great for leveling up the ride of your vehicle, or giving you added lift, and can be used in conjunction with Coil Strut Spacers (in the Front) without changing your genuine ride quality. Supplied complete with extended U Bolts and lift blocks to fit for 2.5" springs. One kit is required per vehicle. Aupart Suspension Lift Blocks are manufactured from mild steel so that they can resist damage from debris, and are suitable to withstand all the conditions.

Part Number	Application	Lift Block Height
AX0373	MITSUBISHI TRITON ML-MN 06-15	50mm

TAPERED SUSPENSION LIFT BLOCKS

The Aupart Lift Block kits have been designed as an economical bolt in suspension option to simply raise the Rear suspension, manufactured from high quality components and completed in a discreet E-coat black finish for that factory look, you will struggle to know it's there. To compliment the additional height in the Rear we have a Coil strut spacer option to match the extra height in the Rear, these will level up the Front suspension where required giving an all-round improvement. The lift blocks feature a tapered face to correctly align the pinion angle as a result of the newly installed lift block, reducing the likelihood of increased driveline vibrations with the increased ride height.

DOOR BRACKET EXTENSION

The Aupart Door Bracket Extension has been developed to suit for Patrol GU. The design of the OE door bracket on the GU's restricts the small door from opening as wide as it could. Installation of the Aupart Door Bracket Extension allows you to maximize the opening of your Rear door - so you get easier access to the back of the vehicle! Super easy to fit, and suitable for all GU's.

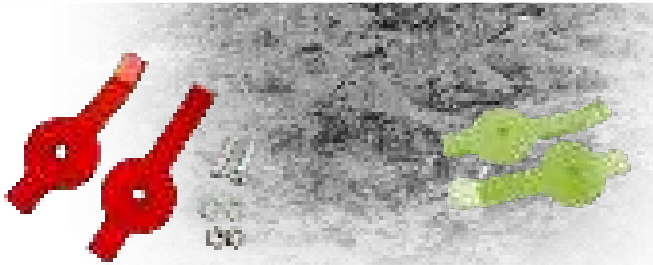
Part Number	Application	Suit
AX0430	NISSAN PATROL GU 97-10 Y61	All

COIL RETENSION

Aupart Coil Retainers are a simple heavy duty bracket designed to effectively fix the bottom of the coil down on the diff, to eliminate the chance of the coil becoming separated from the vehicle. When combined with the Aupart Bolt-In Coil Drop Out Cone, a longer shock (approx. 3.75") can be used which will all work together to give the vehicle more down travel during articulation.

Supplied as a pair.

Part Number	Application	Finish
AX0445	COIL RETAINER KIT (Pair)	Black e-coating



LIFT BLOCK

Aupart machined alloy Body Lift Blocks are suitable for universal fitment. Manufactured with 62mm OD with 13mm ID, allowing for 50mm (2") lift, Aupart Body Lift Blocks are supplied complete with Black E Coating for discreet installation.

Part Number	Application	Compatible With	Height
AX0343	BODY LIFT BLOCKS	UNIVERSAL	2"
AX0719	Rear K-FRAME SPACER KIT	NISSAN PATROL Y62	12mm

Note –
For Shorty Patrol x 8 are required.
For Patrol Wagon x 10 are required.

Aupart Coil Drop Out Cone Kits is the simple bolt-in solution to the age old problem of coils coming loose, and trying to relocate, under down travel during articulation (not reseating properly). Aupart Drop Out Cones fit snuggly under the coil hats and basically work by allowing the coil to drop down an additional 3.75"before they will fall out.

Combining the Aupart Coil Drop Out Cones with the Aupart Coil Retainers (to secure the base of the coil to the diff) allows for a longer shock (approx. 3.75") to be used. Finished in black e-coating,

Supplied as a pair.

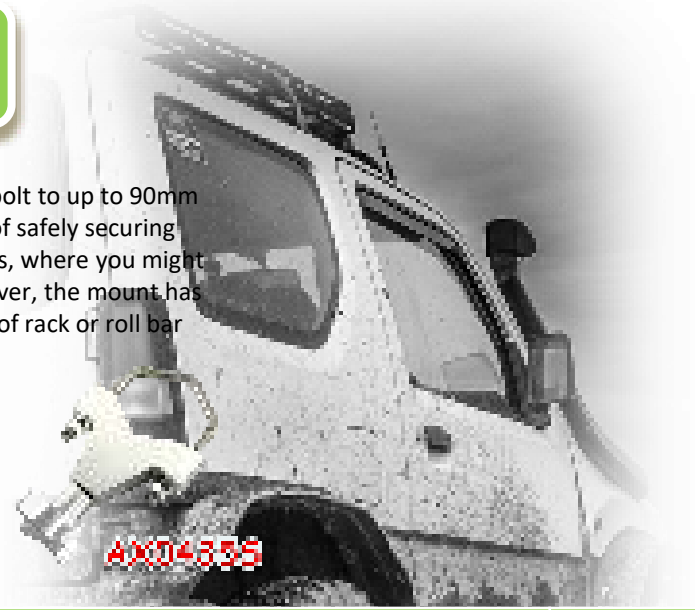
LIFT JACK ACCESSORIES

The Aupart Universal Lift Jack Holder has been designed for a universal fit, to bolt to up to 90mm OD tube (approx. 3.5”). This fully adjustable tube mount, is a very handy way of safely securing your lift jack onto the bull bar or roof rack for your exciting off road adventures, where you might need “quick, easy & often” access to the lift jack! Finished in either Black or Silver, the mount has been designed to suit for a wide variety of options, and can also be used on roof rack or roll bar applications.

Part Number	Application
AX0435B	UNIVERSAL ADJUSTABLE LIFT JACK HOLDER - BLACK
AX0435S	UNIVERSAL ADJUSTABLE LIFT JACK HOLDER - SILVER



BRAKE PROPORTIONING VALVE BRACKET

The Brake Proportioning Valve on your Patrol controls the amount of Rear brake that is applied when you put your foot on the brake pedal. The higher you lift your Patrol the less brake is applied. The system itself is a great one, and ensures that if your vehicle is loaded for towing, and the back is lower, more Rear brake is applied. To retain the standard brake bias on a lifted Patrol, Aupart have a simple bracket extension to reposition the Brake Proportioning Valve.

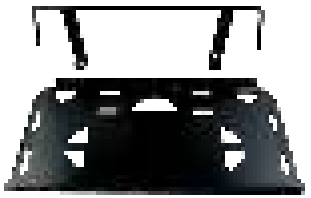
4X4 ACCESSORIES



AX0483

We've been busy looking at things outside the square that a Four Wheel Driver, who hits the bush tracks at the weekend & in holidays, really wants. It appears that on top of the list is more room! So we've worked at manufacturing a tray to allow you to carry more, outside the vehicle. The new Aupart Rear Spare Wheel Tray is fitted atop the outside Rear spare, and locks down on the tyre via a ratchet tie down. As a guide only the Load Limit has been set at 120kgs (static) & 60kgs (mobile) - but please check to ensure any load applied to the tray does not exceed spare wheel carrier load limits. If you don't want to store stuff on the tray, you can use it as a step to the roof rack, in conjunction with the tyre step, for easy roof access. Super easy to install the Aupart Rear Spare Wheel Tray fits from 14" to 37" spares.

Part Number	Application
AX0485	UNIVERSAL Rear WHEEL TRAY (Include RATCHED TIE DOWN)
AX0486	UNIVERSAL Rear WHEEL STEP (To Suit AX0485)
